ConnectFlow: the store management solution for retail

Your retail environment is dynamic. You must respond quickly to changes and always have real time information. With ConnectFlow you can manage your organization centrally. By using the latest technology this can be done real time. Your retail environment is the starting point for our store management solution.

Control of you retail organization

With less effort, you can manage your property and stores centrally. Besides daily operations you can manage new versions and updates. You can manage your Point of Sale environment remote. From the head office you can for example see your financial balance from any random branch. You have ultimate control over your organization thus improving efficiency and profitability.

Real time retailing

ConnectFlow provides centralized and decentralized real time information. The latest data is stored in a single database and always at your disposal. The insight in your organization will expand. You can add online promotions and will be able to attract, identify and reward customers with online vouchers and bonus points. You can consult stock and scan returns online. The service and efficiency will improve and thus increasing customer satisfaction.

Better understanding of your retail transactions

All transactions within your retail environment are safely stored in ConnectFlow. This gives you a great tool for sales and audit management e.g. real time stock reports, number of returns, staff turnover and sales per store. You can easily connect ConnectFlow with your financial administration. You are able to request correct information any time wherever you are. This gives you better insight into store transactions and you are able to direct and control certain transactions.
